6.2.4 Glenelg North Flood Affected Area

In accordance with her notice Councillor Bouchée asked the following questions:

Can Administration please advise what has been done so far in the Glenelg North flood affected area?

Acting General Manager Environment and Engineering response.

Since the flooding event of June 2003, Council has raised areas of the eastern Patawalonga bank either side of the King Street Bridge by approximately 300mm.

In conjunction with the City of West Torrens, the Patawalonga Catchment Water Management Board and the Department of Water, Land and Biodiversity Conservation a pumping station has been installed at Shannon Avenue. This then allows the Weir 2 gates to operate at the design level of two metres.

An Emergency Management Plan has been developed and adopted for the Patawalonga Lake operation.

Council in conjunction with the Department of Water, Land and Biodiversity Conservation has initiated the Patwatch group to monitor the operations of the lake.

Have the issues in relation to the drains in the area been solved i.e. water backing up and flooding streets /water backing up into drains from the high level of the Pat?

Acting General Manager Environment and Engineering response.

Because of the invert of the pipes at the entrance to the Patawalonga Lake being submerged, the drainage system will always consist of ‘wet pipes’. The 2003 flooding event was caused by water breaching the banks either side of the King Street Bridge rather than water backing up in the system.

Following the flood a great deal of debris caused a blockage in the drain at West Lane which was exacerbated by rocks placed close to the outfall in the lake during the redevelopment of the Patawalonga. Since this time the rocks have been removed from around the outfall. As well as this an opening with a grate has been cut into the pipe half way down the bank of the Patawalonga Lake to allow any water to flow out of the pipe in the event of a blockage.

What are the plans in relation to this area?

Acting General Manager Environment and Engineering response.

This area forms part of the of a Flood Plain Mapping area, for which work is being undertaken currently and from which critical analysis will highlight the risk and subsequent further works requirements to alleviate flooding issues in this low lying area.
6.2.5 **Confidential Verbal Report on Broadway Kiosk**

In accordance with her notice Councillor Bouchée asked the following questions:

When will the verbal report which was done “In Confidence” in relation to the Broadway Kiosk be provided to Members of Council in writing. I ask this as there was Legal Advice obtained which has a significant bearing on the Lease discussions.

**Executive Manager Finance and Corporate response.**

The verbal report will not be provided in writing.

When will Council receive in writing:

1. The Financial details in the Lease agreement being negotiated;
2. The buy back financial details;
3. How will we account for this buy back amount in the budget; and
4. When will Council see the final Agreement (Lease or any supportive documentation from all parties) which I would presume must be prior to the sign off, as all final financial details being negotiated have not been made available to Council

**Executive Manager Finance and Corporate response.**

1. Please refer to separate Confidential Report 548/06.
2. Please refer to separate Confidential Report 548/06.
3. Please refer to separate Confidential Report 548/06.
4. Pursuant to Council’s (confidential) resolution of 13 September 2006, the final agreement will be presented to Council for information when it has been signed and sealed by all parties.

6.2.6 **Cleanliness of Pavements in front of the Pier Hotel and the Grand Hotel**

In accordance with her notice Councillor Tilley asked the following question:

Who is responsible for the cleaning of the pavements in front of the Pier Hotel, and Hotel Grand?

The pavements I am referring to, are in front of the eastern entrance of the Hotel Pier, which is the main entrance for guests to enter, and on the northern side of the Hotel Grand where people line up to enter the Hotel.
**Background**

The pavement in front of the Pier Hotel (which is supposed to be one of our many Tourist Hotels), are filthy, have grease all over them including dried up “vomit”. I approached the cleaner who was cleaning the tiles immediately in front of the hotel on their “veranda” type area. He stated they only cleaned to that edge. The pavers were not their responsibility.

The Grand “clean up” is mainly stacks of paper cups etc. which are thrown on the ground from “takeaway coffee” whilst waiting to enter the Hotel.

These two areas in particular need to be addressed as soon as possible as it does not give a good image to our City. Should the owners of these properties be responsible as similarly we expect restaurateurs to be?

**Acting General Manager Engineering and Environment response.**

The area to the east of the Oaks Pier Hotel entrance is under the care and control of the Community Corporation that manages the hotel, which includes the passenger drop off area and car park.

The area north of the Grand Hotel entrance is Council owned footpath. This area is subject to the general cleaning regime of Moseley Square maintenance.

Typically these areas are cleared of litter and debris on a daily basis, with a steam cleaning operation programmed three times per year. This area has not been steam cleaned this year because of the Moseley Square construction works, however, the cleaning contractor commenced cleaning the Jetty Road precinct (eastern end) on the evening of 29 October and will complete the cleaning in Moseley Square early in the week commencing 6 November 2006. The cleaning which will include the entire area west of Colley Terrace, in readiness for the opening of the Moseley Square Redevelopment.

7. **REPORTS BY DELEGATES OR REPRESENTATIVES**

Councillor Bouchée spoke regarding the interest of PatWatch Committee, in de-silting of the Barcoo Inlet. There has been a large amount of work completed behind the scenes, Councillor Bouchée will present the Minutes of the group when they are available.

- In summary, subject to the earlier qualifications, the role of an Elected Member’s spouse is optional and flexible and that the management of interaction between an Elected Member’s spouse and the Council administration is at the sole discretion of the Chief Executive Officer.

Council commissioned a study of the origin/destination of traffic using the bridge in late 2005. The results of this study were provided for Members’ reference.

It is estimated that 70% of the traffic using the bridge would be considered as “through” traffic.

The Transport Planning Division of Transport SA advised Council that it would prepare its own report of the likely traffic scenario if the King Street Bridge was removed from the traffic network. It is understood that this survey has now been completed, and a report is being prepared for consideration by the Minister for Transport, Energy and Infrastructure.
